Professional Summary

- Data operations and business systems professional with 6+ years across financial services, including business analysis, QA/UAT, BI reporting, and platform data management
- Maintains data accuracy, integrity, and reconciliation across multiple financial systems using advanced SQL, Python automation, and structured validation processes

Core Competency/ Skills

- **Data Operations:** data validation, reconciliation, cleansing, deduplication, enrichment, database hygiene, data migration, records remediation
- **Platform & Business Systems Support:** day-to-day platform administration, workflow execution, reporting maintenance, account & contact data management, user permissions and configuration changes, SOP / process documentation
- **Reporting, Visualization & Analysis:** Power BI (DAX), Tableau (Tableau Prep), MS Excel (Pivot Tables, XLOOKUP / VLOOKUP, INDEX/MATCH, conditional formatting), SQL (complex queries, joins, stored procedures), Python
- **AI-Assisted Delivery:** Claude Code, Codex — requirements analysis, rapid prototyping, automation of repetitive data and reporting workflows
- **Methodology:** Agile, Waterfall
- **Language:** English (Fluent), Mandarin (Fluent), Cantonese (Native)

Work Experience

Data Operation Analyst

Jan 2026 – Present

EliteRewards

- Administer day-to-day operations of a live production rewards platform, maintaining data accuracy, completeness, and consistency across member accounts, contact records, statuses, and transaction data
- Maintain core data management processes: data cleansing, deduplication, reconciliation, and enrichment across member, trading, and transaction records
- Build and maintain recurring reports and dashboards — monthly statements, P&L, activity metrics, and account reconciliation — supporting operational tracking and business reporting
- Execute outbound communications to segmented recipient lists using managed message templates — template versioning, BCC handling, delivery tracking, and re-send rules
- Delivered a full production data migration: schema migration, record consolidation, cross-system reconciliation, and post-cutover catch-up sweeps with zero data loss
- Integrated the Tradovate API to automatically connect trading accounts, synchronize and reconcile trade data, process historical backfills, and identify accounts requiring reconnection
- Automated the end-to-end reward fulfilment lifecycle — validating balances and inventory, allocating redemption codes atomically, processing scheduled requests, sending redemption emails, and supporting administrative workflows for restocking, held redemptions, approvals, and points adjustments

Business Support Specialist

Mar 2025 – Sep 2025

EQ Bank

- Performed SQL queries for data validation, reconciliation, and back-end testing to ensure system accuracy and integrity
- Designed reporting solutions in Power BI, enabling leadership to monitor project outcomes and operational performance with real-time insights
- Built Python-based automation scripts that streamlined data collection, cutting manual effort by 80% and reducing error rates in reporting workflows
- Led small to medium-scale internal projects, gathering and analyzing business and technical requirements to support system investigations and root-cause analysis
- Facilitated workshops and project meetings, aligning cross-functional stakeholders and reducing scope ambiguity during investigations

Quality Assurance Tester

Feb 2024 – Sep 2024

KPMG Canada

- Developed interactive Power BI dashboards to visualize QA metrics, improving real-time decision-making for stakeholders
- Developed and executed 100+ test cases and scripts, reducing testing time by 15% through automation improvements
- Led user acceptance testing (UAT) efforts, resolving 50+ defects, which contributed to a 20% reduction in post-launch issues

Business Analyst

Sep 2021 – Jun 2022

DBS Bank

- Championed a structured requirement gathering initiative with 10 stakeholders, resulting in the creation of a detailed project scope document that guided the development process and improved project tracking by 20%
- Partnered with business and technical teams to design system enhancements, resulting in a 30% reduction in downtime
- Performed system verifications and defect analysis, cutting operational downtime by 25%

QA Analyst

Jun 2019 – Sep 2021

BestServe Financial Limited (subsidiary of Sun Life Financial)

- Executed comprehensive testing protocols during a \$5 million pension system migration, achieving a 98% accuracy rate in defect identification and enhancing overall system reliability
- Directed UAT processes, identifying and escalating 70+ defects, ensuring 5% faster project completion
- Coordinated testing logistics and defect analysis across internal teams and external vendors

Education

Bachelor of Business Administration, Applied Economics

Hong Kong

Hong Kong Baptist University

Sep 2016 – Jun 2018
